Minutes for the meeting (with TA) 2023-03-07

Location: Drebbelweg IZ 2
Date: 2023-03-21
Time: 16:45-17:30
Chair: Jan
Minute-taker: Aiste
Attendees: Aldas Lenkšas, Aistė Macijauskaitė, Leonardo Marcuzzi, Jan Maris, Rebecca Andrei (Group 79)

Minutes

- Announcements from TA
    - Rubric on mattermost
    - Another formative rubric on brightspace
    - Note to check out the grading model every time before uploading an assignment
- Our works
    - Update on the work we have been doing
- Our announcements.
    - Almost finished minimal application
    - Started working on multi-board
- Demo showcase
    - Showed the current state of the product, front-end and back-end
- Questions to TA
    - Question about databases for the users. There are solutions that we can come up with without storing the users. Log-in is not bad, we can have it as an extra feature.
    - Questions about merge requests. Naming is good, there are more descriptions which is good, code suggestions are great.
    - Question about the checkstyle, we can change it along the way.
- Feedback from our chair
- Feedback from TA
- **Notes**
    - Note that there should be time tracking on issues
    - Note to follow the order of the backlog, we will be graded on how we follow priorities. Do issues from one milestone that is the highest priority.
    - Solve the way we identify boards with the user. We should assume users know the identifier and create a connection between user IP and the board. Store it on the files, remember on the client side what boards did the user join.
    - We should pick up a faster pace
    - When we have feedback link it to the heuristic (we can do it using numbers)
    - Move issues to the next sprint when the milestone expires
    - Make sure to put in the same effort (code lines doesn't matter, effort matters)

- **What should be done**:

Deadline	Task
21/03/2023	We have to do a rubric on mattermost

TUDelft

28/03/2023	We have to check out formative rubric on Brightspace (assignments -> tasks and formative feedback)

TUDelft
